

SECURE ONLINE DATA BACKUP AND RECOVERY SERVICES

Online Backup and Recovery for Businesses

Ensure Disaster Recovery readiness by enjoying one-step backup and offsite storage. Free-up IT resources and administrator time with hardware-free, maintenance-free online backup from DataSafe.

Quick & Easy Setup

One software client can back up multiple networked servers and workstations, so you won't have to install agents on every computer you want to back up – saving time and money, during the installation process.

Fast Backups

Following the initial backup, only changed data is detected, compressed, deduplicated, and encrypted before being pushed outbound and secured in world-class datacenters.

Secure Backups

In-flight and at-rest, data remains encrypted at all times. Data is stored on industry-leading disk arrays in geographically-dispersed, world-class datacenters. Premium safeguards protect your data, and full redundancy is ensured.

Full Redundancy

Data centers and vaults operate in a “high availability” configuration so you will always have access to your data. In addition, we can provide up to triple redundancy of your

Did You Know...?

20% of small-medium businesses suffer a major disaster every five years.

backup data for the ultimate in Disaster Recovery readiness – and satisfy any compliance regulation.

Wide Support

High performance data protection is delivered to simple networks or complex enterprise environments, with support for Windows, Unix, Linux, Mac, and IBM i. VMware and Sharepoint are fully supported as well.

Premium Recovery

Perform smaller restores quickly and easily over the internet via a simple wizard. Alternatively, since we manage a fleet of mobile vaults, we can overnight your data for a full disaster recovery if required.

Granular Exchange Backup

Specific application integration ensures proper backup and fast, error-free recovery for Exchange – including an optional capability to backup and restore message-level detail.

Optional Features

- Continuous Data Protection – your most critical systems are protected throughout the day.
- Local Backup Copy – Schedule local backups to any UNC path disk (SAN, NAS, DAS, etc.) with no additional storage, software, or hardware charge from DataSafe.
