

BOXES AND CONTAINERS

DATASAFE STORAGE BOXES

Our DataSafe boxes are made of recyclable corrugated cardboard. Double walls double reinforced handgrips, and a smooth, well-supported floor ensure a super strong box. They can be assembled in 10 seconds or less and don't require tape. The DataSafe carton is designed specifically for storage. Contents of one letter-size file drawer fills 1½ cartons with files stored front to back one legal file drawer fills two DataSafe cartons with files stored side to side. We also offer storage cartons which house oversized documents, such as blueprints, architectural drawings and x-rays. These cartons are available for purchase in any quantity and can be delivered to you within 24 hours.

	Standard	Ledger	Small Blueprint	Large Blueprint
Height	10"	20"	3"	6"
Width:	12"	6"	3"	6"
Depth:	15"	15"	42"	42"

DESTRUCTION AND RECYCLE BOXES

Our DataSafe Destruction and Recycle Boxes provide an efficient and cost effective method of disposal for confidential and sensitive materials. DataSafe has found that within many employees simply tear up documents and throw them in the nearest waste receptacle, where it is subject to retrieval by unauthorized individuals. Our DataSafe Destruction and Recycle Boxes are intended to fill this security gap with an easy to implement, cost effective product. Regardless of size, any company will find that using our clearly marked Destruction and Recycle boxes throughout your organization (under each desk) will simplify existing records management procedures and minimize existing security risks.

STEEL CONTAINERS

We use specially designed 22-gauge steel containers to stow your media. They are locked and bar coded-providing your disk packs, magnetic tapes, diskettes, CD-ROMs, cartridges, microfilm and microfiche materials with maximum protection against fire and water damage.
